
(a) convex A: supporting line for $n = (0, 1)$
$\langle n, y \rangle = h_A(n)$
A
∂A
$\partial\,\mathrm{conv}A$
(b) non-convex A: supporting line for $n = (0, 1)$
$\langle n, y \rangle = h_A(n)$
tangent at the dent,
not supporting
A
∂A
$\partial\,\mathrm{conv}A$
(c) support function over $\mathbb{S}^1$
$\langle n(\theta), x \rangle$
$h_A(n) = \max_{y \in A} \langle n, y \rangle$
$N^1_+ \partial A$ in $(\theta, \langle n, x \rangle)$
normal angle $\theta/2\pi$
(d) support function over $\mathbb{S}^1$
$\langle n(\theta), x \rangle$
$h_A(n) = \max_{y \in A} \langle n, y \rangle$
$N^1_+ \partial A$ in $(\theta, \langle n, x \rangle)$
normal angle $\theta/2\pi$
